- K1312 Drive Rod 12" for use with 24" Extension Rods

The K-100 Economy Kit measures the shear strength of soil with a CBR between 10-100. This kit is ideal for the engineer who occasionally needs CBR values in the field. The single mass structural steel hammer is standard with this kit. Also included is a hardened point, manual & CD, and 3-in-1 oil. The User's Manual provides look up tables for CBR and psf to correlate to the number of blows between the 2" rings marked on the Drive Rod.

Please Note: The K-100 Economy Kits DOES NOT come with a carrying case or Vertical Scale. Disposable cones, Adapters, additional Hardened Points, and Pelican cases are sold separately.

Quick-Connect Pin makes assembly a snap!

This DCP *only* requires one operator to do a test.

K100E Quick-Connect Economy DCP Kit for \$1,199.52*

*plus Shipping: 30 lbs, 45"x6"x6"

DCP Model K100E is strong, compact and ergonomically designed for one person to use testing a single lift.
